

Physical Stages of Terrestrial Planet Formation with Gas Drag and Dynamical Friction

Stage I: Oligarchic Growth ($t < 3$ Myr)
Aerodynamic Gas Drag & Dyn. Friction

Nebular Gas Disk ($\tau_{\text{gas}} \sim 2$ Myr)

Stage II: Secular Depletion ($t \sim 3 - 30$ Myr)
 ν_6 Resonance & Water Delivery Influx

Stage III: Final Planetary System ($t \sim 100$ Myr)
Earth/Venus Assembly & Volatiles
